Attorney General. We are authorized to announce R. W. Harwood, Esq., as a candidate for the office of Attorney General, for the Ninth Judicial District, composed of the counties of Williamson, Summer and Davidson Election next May. Special attention is invited to Mesers. Harny Reomen's ummense sale of Furniture, Carpets Matting,

Feather Reds, Pillowa, Bolsters, Matrasses, Pianos, c., &c., this morning at 10 o'clock. Fever and Ague,

from which mankind suffer over a large part of the globe, is the consequence of a diseased action in the system, induced by the poisonous missin of vegetable decay. This exhalation is evolved by the action of solar heat on wet soil, and rises with the watery vapor from it. While the sun is below the horizon this vapor lingers near the earth's surface, and the virus is taken with it through the lengs into the blood. There it acts ood of the body in the internal excretories to fore ushes to the central organs with congestive violence

as an irritating paison on the internal viscera and ex-creting organs of the body. The liver becomes torpid and fails to secrete not only this virus, but also the bile from the blood. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach inally, the instinct of our organism, as if in an attempt Figure follows, in which the blood leaves the central organs and rushes to the surface, as if in another effor to expel the irritating poison through that other great excretory—the skin. In this also it fails, and the system abandons the attempt exhausted, waiting for the recovery of strength to repeat the hopeless effort another day. These are the fits or Larvaysms of FEVER AND ACUE. Such constitutional disorder will of course undermine the health fi it is not renoved.

We have labored to find, and have found, an antidote,

Ayer's Ague Cure, which neutralizes this malarious poison in the blocd and stimulates the liver to expel it from the body. A it should, so it does cure this afflicting disorder with perfect certainty. And it does more, or rather does that is of more service to those subject to this infer If taken in season it expels it from the system as it is absorbed, and thus keeps those who use it free from its attacks; keeps the system in health al-hough exposed to the disease. Consequently it not only cures, bu protects from, the great variety of affections which ar ed by this mulignant influence, such as Remitten r, Caill Fever, Dumb, or Masked Ague, Periodica algia, Rheumatism, Gout, Blindness, Toothache, Ear ache, Cataerh, Asthma, Palpitations, Painful Affection of the Spleen, Hysteries, Coile, Paralysia, and Painful Affections of the Somach and Bowels, all of which, when arising from this cause, will be found to assume more or less the intermittent type. This "Aoue Cure" removes the cause of these derangements, and

ures the disease.

This it accomplishes by stimulating the excretories o expel the virus from the system; and these organs by degrees become habited to do this their office of their was accord. Hence arises what we term accimatation. Time may accomplish the same end, but often life is not ong enough, or is sacrificed in the attempt, while this "Agure Cune" does it at once, and with safety. We have great reason to believe this is a surer as well as safer remedy for the whole class of diseases which are caused by the minimatic infection, than any other which been discovered; and it has still another important antage to the public, which is, that it is cheap as
